## About me

I'm passionate about the world of **web development** and enjoy both creating and sharing that passion. As a *web developer and instructor at SMIT*, I thrive on building functional and engaging websites that bring ideas to life. My expertise also lies in utilizing WordPress, a platform I find versatile and user-friendly. Beyond development, I relish the opportunity to mentor others on their web development journey. My role as a web instructor allows me to translate my knowledge and experience into digestible lessons, empowering students to build their own web skills and confidence. Whether I'm crafting compelling websites or equipping future developers, I'm driven by a desire to contribute to the ever-evolving digital landscape. Feel free to connect with me if you'd like to discuss web development, share experiences, or learn more about my work!

## Funny Quotes for Developers

- Software comes from heaven when you have good hardware. - Ken Olsen There is always one more bug to fix. - **Ellen Ullman**
- If debugging is the process of removing bugs, then programming must be the process of putting them in. - **Sam Redwine**
- Talk is cheap. Show me the code. — **Linus Torvalds**
- Sometimes it pays to stay in bed on Monday, rather than spending the rest of the week debugging Monday's code. - **Dan Salomon**
- Computers are fast; developers keep them slow. - **Anonymous**

Tatheer said, "The early bird gets the worm".

# Education

I'm final semester student at Department of Computer Science, UOP

---

*Computer science* is a broad and multifaceted field, but at its core, it can be defined as the study of computation, information, and automation. It spans a wide range of theoretical and practical disciplines, encompassing everything from the fundamental principles of how computers work to the development of software, hardware, and algorithms that power the modern world.
